

# Reception: Growing and Changing Parent Information

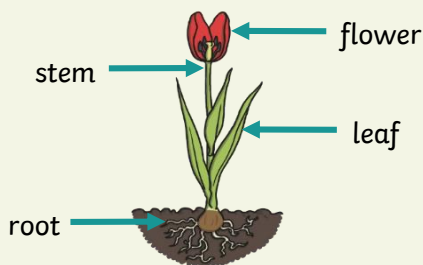

## Our Linked Story

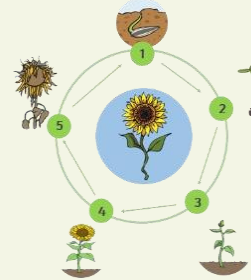

Jack sold his cow for magic beans. The beans grew into a magical beanstalk with a castle at the top. Jack stole the golden hen from the giant and climbed back down the beanstalk.

### Parts of a Plant

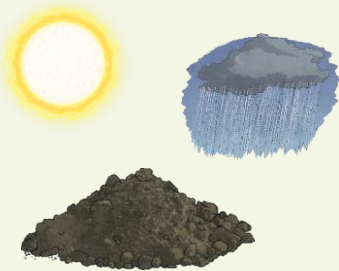

Plants have petals, roots, leaves and a stem. The stem holds the flower upright. The roots help the flower to collect nutrients from the soil.

### Lifecycles

A life cycle is the different stages of life for a living thing. Both plants and animals have a lifecycle. They change over time. The life cycle is repeated.

### Plants need

Plants cannot grow in dark, cold places or without water.

### Germination

Germination is where a seed starts to grow into a plant.

### Plants as food

Plants help people and animals to live. They provide food for people and animals to eat.

## Vocabulary

plant sunlight soil water seed lifecycle germination
